Oral Changes and Tobacco Use

Essential Knowledge and Skills for Tobacco Dependence Treatment in Dental Practice Webinar Series

Have you been wondering how to support your patients who smoke? Are you wondering how to integrate smoking cessation into your patients’ other treatment? The TEACH Project invites dental professionals to attend a three-part webinar series on Essential Knowledge and Skills for Tobacco Dependence Treatment in Dental Practice!

HOW TO PARTICIPATE
You must register through the online application located at www.teachproject.ca under “Oral Changes and Tobacco Use Webinar Series”

These sessions are free to attend and offered online through Adobe Connect Webinar.

SESSIONS: Note you may choose to take all three sessions or can take stand-alone sessions

1. Oral Effects of Tobacco Use and a Framework for Brief Interventions Friday December 7th 2012 | 12:00 – 1:00pm
   Application Period: November 12th - December 6th, 2012

2. Pharmacotherapy for Tobacco Dependence Treatment: Nicotine Replacement Friday January 18th 2013 | 12:00 – 1:00pm
   Application Period: December 7th 2012 – January 17th 2013

3. Pharmacotherapy for Tobacco Dependence Treatment: Prescription Medications (bupropion and varenicline) Friday February 15th 2013 | 12:00 – 1:00pm
   Application Period: January 18th – February 14th 2013

An Application for Program Approval has been sent to the Royal College of Dental Surgeons of Ontario, Quality Assurance Program (1 CE Points Category 1: Core Courses per webinar)

The Training Enhancement in Applied Cessation Counselling and Health (TEACH) Project aims to ensure that practitioners who provide services to people who use tobacco have the specialized knowledge and skills to deliver effective, evidence-based cessation interventions.
